

# Company Profile

Aegis Safety is a height safety and confined space specialist located in Brisbane and operating Australia-wide. With over 25 years experience in the industry, Aegis Safety has all your specialist safety needs covered.

Our dedicated team of product experts and technicians provide professional advice on all of our products and services.

As well supplying height safety and confined spaces equipment, Aegis Safety also provides a large range of general safety equipment, gas detectors, fire safety equipment, breathalysers and defibrillators.

Aegis Safety is one of Australia's largest suppliers of BW gas detection products and accessories. Through our dedicated service department, we carry out equipment maintenance and inspection both on site or within our fully equipped service facility. Our service covers portable and fixed gas detection, breathing apparatus and portable fire equipment, anchor points, horizontal or vertical lifeline systems, harnesses and confined space equipment.

Contact us today to see how we can help you.
